Summary of scientific research

My research is focused on three areas of medieval philosophy: 1) The thought of Thomas Aquinas, in particular his metaphysics. 2) The doctrine of the transcendental notions 'being', 'one', 'true' and 'good'. The project has a historical and a systematic aspect. It investigates the history of the doctrine from its beginning in the thirteenth century (Philip the Chancellor's *Summa de bono*) to the *Disputationes metaphysicae* of Francisco Suarez (1597), which form the bridge to the transcendental tradition in modern philosophy. The project also inquires into the systematic importance of the doctrine for philosophy in general. 3) Meister Eckhart as a 'systematic' thinker: A reconstruction of his *Opus propositionum*. As Eckhart himself indicates, 'The Work of Propositions' provided the foundation of the two other parts of his *Opus tripartitum*. However, the work has not come down to us.
